CHAPTER 1

Introduction

1.1	Photovoltaic and renewable energy resources	01
1.2	Photovoltaic and Photovoltaic Cells	02
1.3	Photovoltaic Effect	03
1.4	Working of photovoltaic cell/device	03
1.5	Types of PV cell materials	05
1.5.1	First Generation PV cells	05
1.5.1.1	Single-crystal silicon	06
1.5.1.2	Polycrystalline silicon	07
1.5.1.3	Gallium Arsenide (GaAs)	08
1.5.2	Second Generation Solar Cells	08
1.5.2.1	Amorphous Silicon (a-Si)	10
1.5.2.2	Cadmium Telluride (CdTe)	10
1.5.2.3	Copper Indium Gallium Sulphide (CIGS), Copper Indium Sulphide CIS	11
1.5.2.4	Copper Zinc Tin Sulphide (CZTS)	11
1.5.3	Third Generation Solar Cells	12
1.5.3.1	Dye Sensitized Solar Cells	13
1.5.3.2	Quantum-Dot Sensitized Solar Cells	14
1.5.3.3	Organic Solar Cells	14
1.5.4	Fourth-Generation Solar Cells	15
1.6	Aim of Project	16
1.7	Conjugated Polymer P3HT	16
1.8	Novelty of project work-Single Molecule Precursor	17
1.9	Scope and method of study	18
1.10	Conclusion	19
1.11	References	19

CHAPTER-2

Experimental and Characterization techniques

2.1	Route Adopted – Colloidal synthesis	21
2.2	Synthetic Strategy	22
2.3	General description of characterization techniques used	26
2.3.1	Optical Characterization	27
2.3.1.1	Theory of UV-Vis absorption spectra	27
2.3.1.2	Photoluminescence Measurements	34
2.3.1.3	Time Resolved Photoluminescence	38
2.3.2	Structural and morphological characterization	40
2.3.2.1	X-ray Diffraction	40
2.3.2.2	Theory of Scanning Electron Microscopy	45
2.3.2.3	Transmission Electron Microscopy	48
2.3.3	Spectral Study	53
2.3.3.1	Theory of FTIR spectroscopy	53
2.4	References	55

CHAPTER-3

Synthesis of II - VI nanoparticles using single-source precursors

3.1	Synthesis of CdS nanoparticles using single source precursors	57
3.1(a)	Introduction	57
3.2	Synthesis of CdS nanoparticles using cadmium ethylxanthate	59
3.2(a)	Introduction	59
3.2(b)	Synthesis of Cd (C ₂ H ₅ OCS ₂) ₂	59
3.2(c)	Synthesis of CdS Nanocrystals	60
3.2(d)	Results and Discussion	61
3.2(d)-(i)	TGA and DSC studies	61
3.2(d)-(ii)	Optical Property – Photoluminescence(PL) Study	62
3.2(d)-(iii)	Optical property- UV absorption study	63
3.2(d)-(iv)	Structural Characteristic-XRD Study	65
3.2(e)	Conclusion	67

3.3	Synthesis of ZnS nanoparticles using single source precursors	67
3.3(a)	Introduction	67
3.3(b)	Preparation of Zinc ethylxanthate	68
3.3(c)	Synthesis of ZnS Nanocrystals	68
3.3(d)	Results and Discussions	69
3.3(d)-(i)	TGA-DTA studies	69
3.3(d)-(ii)	Spectral study-FTIR study	70
3.3(d)-(iii)	Structural Property-EDS analysis	71
3.3(d)-(iv)	Optical Property – UV Absorption study	72
3.3(d)-(v)	Optical Property – Photoluminescence(PL) study	73
3.3(d)-(vi)	Structural Characteristic-XRD Study	75
3.3(e)	Conclusions	76
3.4	References	76

CHAPTER – 4

Band gap engineering in nanostructured CdS thin films from visible range to near infrared by in situ Pb-doping

4.1	Introduction	79
4.2	Experimental	80
4.2(a)	Preparation of Lead ethylxanthate	80
4.2(b)	Synthesis of PbS Nanocrystals	81
4.2(c)	Preparation of Cadmium Lead ethylxanthate	81
4.2(d)	Synthesis of CdPbS Nanocrystals	81
4.3	Results and Discussions	82
4.3(a)	TGA-DTA Studies	82
4.3(b)	Optical property – UV Absorption study	84
4.3(c)	Structural Property –XRD study	88
4.3(d)	Structural Property-SEM and EDS studies	90
4.3(e)	Structural Property- TEM Study	93
4.4	Conclusions	95
4.5	References	95

CHAPTER-5

Direct synthesis of CdS/CdPbS nanocrystals in poly (3-hexylthiophene) polymer for photovoltaic application

5.1 Introduction	97
5.2 Experimental	101
5.3 Results and discussions:-CdS/P3HT nanocomposite	102
5.3(a) Spectral study (FTIR)	102
5.3(b) Optical Property-UV Study	103
5.3(c) Optical Property-PL Study	105
5.3(d) Optical Property-Time Resolved Fluorescence Study	106
5.3(e) Structural Property-XRD Study	108
5.3(f) Structural Property-SEM Study	109
5.3(g) Structural Property-AFM Study	110
5.3 (h) Structural Property-TEM Study	112
5.4 Results and discussions: - CdPbS/P3HT nanocomposite	113
5.4(a) Spectral study (FTIR)	113
5.4(b) Optical Property-UV Study	114
5.4(c) Optical Property-PL Study	116
5.4(d) Optical Property-Time Resolved Fluorescence Study	118
5.4(e) Structural Property-XRD Study	119
5.4(f) Structural Property-TEM Study	120
5.5 Conclusions	122
5.6 References	122

CHAPTER-6

Colloidal Nanocrystals of Kesterite and Wurtzite-Type $\text{Cu}_2\text{ZnSnS}_4$: Facile Noninjection Synthesis and Formation Mechanism

6.1 Introduction	125
6.2 Synthesis of of Kesterite Type $\text{Cu}_2\text{ZnSnS}_4$ Colloidal Nanocrystals	126
6.2(a) Introduction	126

6.3 Synthetic Procedure for Kesterite type $\text{Cu}_2\text{ZnSnS}_4$ colloidal nanocrystals	127
6.4 Results and discussions	130
6.4(a) TGA/DTA Study	130
6.4(b) Spectral study-FTIR	132
6.4(c) Optical property – UV Absorption study	133
6.4(d) Optical property – PL study	135
6.4(e) Optical properties – Time Resolved Fluorescence study	139
6.4(f) Structural properties-XRD study	140
6.4(g) Structural property-SEM-EDS Study	142
6.4(h) Structural property-TEM Study	143
6.5 Conclusion	145
6.6 Formation of Wurtzite type CZTS nanocrystals-Introduction	145
6.7 Synthetic Procedure for Wurtzite type $\text{Cu}_2\text{ZnSnS}_4$ colloidal nanocrystals	147
6.8 Results and Discussions	147
6.8(a) Optical Property-UV absorption study	147
6.8(b) Structural Property-XRD study	149
6.8(c) Structural Property-TEM study	151
6.9 Conclusion	153
6.11 References	154
